

Senior Acoustic Consultant

This is an exciting opportunity to help shape the strategic growth of an expanding consultancy. We are ideally placed in the Northwest for access to all parts of the UK. We have a fresh approach and are looking for individuals who are keen to be part of a strong growing business with the exciting career prospects such expansion brings.

As a Senior Consultant you will be able to develop strong relationships with existing and new clients. You will enjoy working as part of a friendly team and be responsible for managing your own projects and supporting more junior staff with theirs.

You will have six or more years experience with a strong track record of technical problem solving and business development. Familiarity with one of the major computer noise modelling software packages such as SoundPlan or CATT would be a significant advantage. You will have an informed understanding of relevant British Standards, legislation, guidance and good practice.

The basic requirements for the Senior Consultant role are:

- MIOA status or above
- Full UK Driving Licence
- Relevant Degree or equivalent
- Ability to manage projects

Benefits you would have with us include:

- Generous Salary and Pension Scheme.
- Attractive modern offices.
- Prestigious and Interesting Projects
- Opportunity for substantial career progression

To apply, please email your CV and two pdf acoustic reports demonstrating your competence with details of your salary expectation to m.woolley@environoise.co.uk, or by post to:
